

5. Develop an Employee Information Management System using JSP, JavaBeans, JSP Standard Actions, and Expression Language (EL) to display and manage employee records.

Index.html

```
<!DOCTYPE html>

<html>

  <head>

    <title>Employee Management System</title>

  </head>

  <body>

    <h1>Employee Registration</h1>

    <form action="RegisterEmployee.jsp" method="post">

      Emp ID: <input type="number" name="eid">

      Name: <input type="text" name="ename">

      Salary: <input type="number" name="esalary">

      <button type="submit">Register</button>

    </form>

  </body>

</html>
```

Employee.java

```
package com.og.practical5c;

import java.io.Serializable;

public class Employee implements Serializable{

  private int id;

  private String name;

  private int salary;

  public Employee(){}

}
```

```
public int getId() {  
    return id;  
}
```

```
public void setId(int id) {  
    this.id = id;  
}
```

```
public String getName() {  
    return name;  
}
```

```
public void setName(String name) {  
    this.name = name;  
}
```

```
public int getSalary() {  
    return salary;  
}
```

```
public void setSalary(int salary) {  
    this.salary = salary;  
}  
}
```

RegisterEmployee.jsp

```
<%@page contentType="text/html" pageEncoding="UTF-8"%>
```

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>

    <title>Welcome Page</title>

</head>

<body>

    <h1>Employee Details</h1>

    <jsp:useBean id="emp" class="com.og.practical5c.Employee"
scope="request"></jsp:useBean>

    <jsp:setProperty name="emp" property="id" param="eid"></jsp:setProperty>

    <jsp:setProperty name="emp" property="name" param="ename"></jsp:setProperty>

    <jsp:setProperty name="emp" property="salary" param="esalary"></jsp:setProperty>

    <h1> Welcome ${emp.name} </h1>

    <h1> Your id is ${emp.id} </h1>

    <h1> Your salary is ${emp.salary} </h1>

</body>

</html>
```
